190	150	260	360	400
216B	70	130	180	230
216C	70	130	180	230
227	130	220	290	360
229	50	70	90	110
23	50	60	70	80
238B	50	80	100	110

Notes: 1) These setback distances are only for the situation where a drainage system will be installed and the landowner wishes to avoid impacting the wetland hydrology. 2) These values assume the ponded water on the site is 0.25" or less. 3) The effective depth of the drain (ditch or tile) is the elevation difference between the ground surface at the approximate setback distance and the water surface in the drain, or the bottom of the drain if it typically has no standing water.
